

Creative Printing Services, Inc. Purchases New State-of-the Art Komori Lithrone S-40 Presses

August 20, 2009

for Immediate Release

Chicago, IL - Creative Printing Services, Inc. has consummated a deal with Komori America Corporation to purchase two new state-of-the art 6-color Lithrone S40 sheet-fed presses. This new equipment features “Artificial Intelligence”, in-line aqueous and Ultra Violet (UV) coating and sophisticated process and quality control devices.

“Artificial Intelligence” or “AI”; enables the presses to automatically recall job settings within seconds on work previously manufactured, including ink readings, plate and paper settings. The new equipment also holds key quality assurance data for Six Sigma interpretation.

Komori America says that “nothing exists or compares to these state-of-the art presses in the region”.

Owner Haves McNeal states “Our new presses will greatly improve productivity, decrease paper waste and lower chemical usage reinforcing our ongoing commitment to continuously improve our sustainability efforts. Our sales force will have a competitive advantage, in terms of quality, manufacturing cycle time and added capabilities”.

The new Komori Lithrones will be integrated with the EFI/ Hagen management information system and recent Fuji technology upgrades in pre-press maximizing quality and productivity.

Creative Printing Services, Inc. continues to improve their value proposition to their clients across the nation with higher levels of customer service, differentiated solutions and competitive pricing.
